Summary

Hello, I'm Nika Mtsituri, a front-end react developer. In 2022, I graduated from the Faculty of Construction of the Technical University of Georgia, after that I became interested in web programming and started studying at the Digital Industry Academy on a web programming course. I have been learning programming for more than 6 months now and with this knowledge I am making projects that are uploaded to my github profile. I want to improve my programming skills and become a professional front-end developer and then a full-stack developer.

Experience
